OBJECTIVE

Dedicated tech enthusiast transitioning from hospitality to tech, with expertise in front-end-development and a keen interest in back-end-technologies. Seeking a full stack developer role to apply my skills in building innovative solutions and contribute to impactful projects.

SKILLS

HTML

CSS

JAVASCRIPT

REACT

BOOTSTRAP

TAILWIND CSS

EXPERIENCE

Feb 2023 - March 2024

Associate

Hotel Industry

Coordinate with multiple departments to ensure smooth operation and prompt resolution of issue. Developed and implemented training programs for new staff members.

PROJECTS

Hamburger Menu

Implemented smooth scrolling ,a hamburger Menu, and a contact form with form validation using HTML,CSS, javascript.

Dynamic Card Generator with Event Listner

Built an interactive web page using html, css , javascript that allow users to dynamically generate new 'card' on the page by clicking a button. Each card displays a unique number, which increment with each new card added
Technologies used : HTML, CSS , JAVASCRIPT(DOM manipulation, event listner)

Key Press Event Listner

Developed an interactive javascript application that detects and displays the key and keycode of any key pressed inside an input box. This project demonstrate my ability to manipulate th DOM, handle user input, and use event listner effectively.

Random color change on Button click

Created an interactive web page that changes the text color of an element randomly upon clicking button. The project demonstrate dynamic manipulation of HTML element and efficient use of JavaScript for generating random colors.

* HTML5 for structure

* Javascript for dynamic functionality and event handling.

Simple Calculator with Multiple Operations

Developed a web-based calculator that perform basic arithmetic operations including addition, substrates, multiplication, and division. The project demonstrate efficient event handling, input validation, and DOM manipulation using javascript.
